

## have a heart

For the month of November, we are celebrating and supporting the Victor Chang Cardiac Research Institute for their amazing work in trying to find a cure for heart disease. They have become a leader in global cardiac research, making new discoveries about adult stem cells, organ donation, heart transplant and the causes of heart disease. As an independent research facility they rely solely on support from grants and fundraising!

And this is where we all can do some good this month:

10 cents from the November sale of each 250mL mango, passionfruit & more, cranberry, raspberry & more and mango, orange & pineapple nudie is donated to the Victor Chang Institute.

If you want to send some love too – buy a Victor Chang nudie, become an organ donor, keep taking great care of your ticker or find out more information here: [www.victorchang.edu.au](http://www.victorchang.edu.au)

We also send out love to our good, old friends at [Jack Watts Currie](#) for donating the artwork of the labels and at [TMA](#) for donating the print of the labels (together we can change the world...!)
